Highlights

This report provides county level demographics on children and households that received child care services through Working Connections Child Care (WCCC) in State Fiscal Year 2005 (SFY05: July 1, 2004 – June 30, 2005). In addition to the notes on each table, detail about the information in the tables and maps is presented in the Methodological Note on the following page. The data in general speak for themselves, but a few findings are worth highlighting:

- Statewide, 23% of WCCC children that used subsidized child care in SFY05 were in households receiving Temporary Assistance for Needy Families (TANF). Of the twelve counties with percentages above the state average, nine were west of the Cascades. The five counties with the highest percentage of WCCC children in households receiving TANF were Klickitat (36%), Skamania (33%), Grays Harbor (31%), King (28%) and Pend Oreille (27%).
- Statewide 51% of WCCC children using subsidized child care in SFY05 received care in child care centers. All five metropolitan counties in Washington (Clark, King, Pierce, Snohomish, and Spokane) exceeded the statewide average. Of the nine counties where less than one-third of the children using subsidized child care were in centers, all but Skagit County were in Eastern Washington.
- Statewide 28% of WCCC children using subsidized child care in SFY05 received care in a licensed family home. All five metropolitan counties in Washington (Clark, King, Pierce, Snohomish, and Spokane) used less than the statewide average. Over half of all children in WCCC were in licensed family homes in five rural counties in Central Washington (Adams, 61%; Chelan, 57%; Douglas, 68%; Franklin, 61%; and Grant, 55%).
- Statewide 20% of WCCC children using subsidized child care in SFY05 received care in an exempt setting, either being cared for in their own home or in the home of a close relative. Only in three rural counties (Ferry, 60%; Pend Oreille, 43%; and Stevens, 34%) were over one-third of all children served by WCCC cared for by exempt providers.
- Statewide, 20% of all WCCC children are Hispanic (of any race), but in six counties in Central Washington over 50% of all WCCC children are Hispanic (Adams, 76%; Chelan, 52%; Douglas, 51%; Franklin, 72%; Grant, 54%; Yakima, 61%). Over one-quarter of all Hispanic children served in WCCC are in Yakima County (3,284 out of 12,211).
- The number of Black or African American children served in King and Pierce Counties per month is 5,293 (3,462 in King County and 1,831 in Pierce County), almost 80% of the total Black or African American children served through WCCC per month (6,672).
- The number of Asian or Pacific Islanders served in King and Pierce Counties per month is 1,016 (759 in King County and 257 in Pierce County), 70% of the total Asian or Pacific Islander children served through WCCC per month (1,458).
- The number of American Indian or Alaska Native children served by WCCC is scattered around the state; 55% are in the five counties that served at least 100 American Indian or Alaska Native children per month (King, 135; Okanogan, 108; Pierce, 111; Spokane, 164; and Yakima, 203). In three counties (Ferry, 26%; Okanogan, 17%; Stevens, 12%) over 10% of children served through WCCC were American Indian or Alaska Native children. Of the 1,311 American Indian or Alaska Native children served per month through WCCC, 28% were in either Yakima or Spokane counties.

Methodological Note

Counts of Children and Households. The information in this report is based on the Social Services Payment System (SSPS) payment files current through December 2005. It covers child care services provided through Working Connections Child Care during the period July 1, 2004 through June 30, 2005. SSPS files do not contain a personal identifier. Fields containing personal information on the primary recipient (household head) were used to create a unique personal identifier for households. Similar fields on the service recipient (person receiving the service or child) were used to create a unique personal identifier for children.

TANF status. All primary recipients were linked to the client tables in ACES to establish whether or not the primary recipient was enrolled in TANF for the month that they used subsidized child care services. The TANF status of the child was based on the TANF status of the primary recipient on whose behalf child care was authorized.

County of Provider. The county of the provider was identified using information in the licensing files indicating the physical location of the provider in addition to the variable for the provider's county contained in the SSPS payment file. Children using providers in more than one county were assigned to the in-state county in which the most payments were made. Children reported in the out-of-state category are those who only used out-of-state providers in the given month. Families approved to receive child care subsidies can use out-of-state providers if the provider meets their state's statutory requirements for licensing and has a cleared criminal background check; most of these situations involve families living near Oregon or Idaho.

Type of Provider. This information is from the SSPS payment files. Children receiving care from more than one type of provider are counted in multiple categories. Exempt Care is child care that is exempt from licensing and is provided either in the child's home or in the home of a relative; Center Care is in a child care center; and Family Home Care is provided by a licensed or certified family home provider. Children whose care could not be assigned to one of these major care categories are reported in the Other/Unknown category.

Race/Ethnicity of Child. Ethnicity was coded based on information from ACES and SSPS; SSPS has only one field available for coding both race and ethnicity. The categories used in this report are: White, Non-Hispanic; Hispanic, Any Race; Black or African American, Non-Hispanic; Asian or Pacific Islander, Non-Hispanic; American Indian or Alaska Native, Non-Hispanic; and Other.

Age of Child. The age of the child was identified using information in the SSPS payment file indicating the age of the child when services were received. The following age categories were used: Infant, under 12 months old in the month of service; Toddler, 12-29 months old; Preschool, 30 or more months old and not eligible by age to be enrolled in kindergarten; School-age, eligible by age to be in kindergarten or a higher grade.

Percent. Percent is based on average monthly number. In three counties averaging less than 25 children served per month, percentage calculations were suppressed because the percentage calculations for those counties will fluctuate widely based on the movement of a few cases.

For further clarification on the information in this report please contact: Jialing Huang, Division of Management Resources and Services (phone: 360-725-4684; email: huangj@dshs.wa.gov).

Source: SSPS payment files, CAMIS licensing files, and ACES eligibility files.

Notes: 1. TANF status was determined based on linkage of primary recipient (household head) information in SSPS payment file to TANF receipt as indicated in the ACES eligibility file. 2. County assignment was determined by the county of the providers, not the county of the child/family, with information on physical location taken from the CAMIS licensing file when available. Families/households/children were uniquely assigned to one county based on the category in which the most payments were made.

Source: SSPS payment files, CAMIS licensing files, and ACES eligibility files.

Notes: 1. County assignment was determined by the county of the providers, not the county of the child/family, with information on physical location taken from the CAMIS licensing file when available. Families/households/children were uniquely assigned to one county based on the category in which the most payments were made. 2. Children receiving care from more than one type of provider are counted in more than one care category; thus the percentages will add up to more than 100%. Only children with codes in none of the three major care categories (exempt, center, family homes) are reported in the Other/Unknown category. 3. Percent is based on average monthly number of children. 4. * Starred counties: percentage data for three counties serving less than 25 children per month on WCCC is suppressed because the percentage calculations for those counties will fluctuate widely based on the movement of a few cases.

Source: SSPS payment files, CAMIS licensing files, and ACES eligibility files.

Notes: 1. TANF status was determined based on linkage of primary recipient (household head) information in SSPS payment file to TANF receipt as indicated in the ACES eligibility file. 2. County assignment was determined by the county of the providers, not the county of the child/family, with information on physical location taken from the CAMIS licensing file when available. Families/households/children were uniquely assigned to one county based on the category in which the most payments were made. 3. The following break-down was used for age categories: Infant, under 12 months old in the month of service; toddler, 12-29 months old; preschool, 30 or more months old and not eligible by age to be enrolled in kindergarten; school-age, eligible by age to be in kindergarten or a higher grade.
